

Comments on Appendices

(Appendices 1-5 are available in Word and Excel forms; Publications are also in *EndNotes*©)

Appendix 1: A list of publications derived from support from the BDG Program.

The printed copy and pdf of this publication list are both in alphabetical order by first author. The Excel spreadsheet is arranged by date. There are currently **531** publications as of this printing. This list is a work in progress and is expected to grow as we add publications that have used the material we have collected; previously we had not kept track of these. Peer-reviewed publications are not marked because, with a few exceptions, everything is Peer-reviewed. For instance, we have not listed the many reports that we have done for various agencies, etc.

Appendix 2: Staff, affiliates, fellows, etc that have worked with the BDG Program from 1985-2010.

The Excel spreadsheet has five worksheets. The title of each worksheet and what it contains:

Degrees (76): Interns, Undergraduates, Masters Degrees and PhD Degrees

Contractors etc. (75): BDG Resident Collectors, Contractors, Education & Training – non-US

Specialists (323): Plant and animal collaborators

Gu-Su-others (83): People in Guyana, Suriname, and others that have worked with the Program

Exp Participants (255): People that participated in BDG expeditions

Currently we have **812** collaborators (sum of the above) listed and the list is growing as we process all of the information in the files. We have converted the Excel spreadsheets to pdfs for the report.

Appendix 3: Outreach and synergistic activities.

This has been compiled only for Funk, Wurdack, Kelloff, and Redden. See proposal for discussions of outreach and education. We will continue to build on this foundation and should have a more comprehensive version available by the time of the evaluation meeting.

Appendix 4: Service and professional recognitions.

This has been compiled only for Funk, Wurdack, Kelloff, and Redden. We will continue to build on this foundation and should have a more comprehensive version available by the time of the evaluation meeting.

Appendix 5: Detailed accounting of base support and ancillary/leveraged funds.

We have received over 3 million in Federal Funds, have raised nearly 2 million in external funds, and acquired over 2.5 million in “in kind” contributions; so around 40% of our funding has come from Federal Funds. But in reality it is hard to grasp the big picture. For instance, the “in kind” contribution does not include the salaries of either Funk or Kelloff or the other SI staff that have participated in BDG or the hundreds of boxes of donated books and journals for the library, or the hundreds of boxes of clothes, school supplies, and toys we have sent to Amerindian villages, etc.

Appendix 6: Five selected publications (out of 528, that's 1/100 of our publications)

Appendix 7: Miscellaneous

History of BDG Program - Prepared for the BDG 2005 External Review

Plant Pathway

Entomological Sampling Methods

BDG Newsletter

Report of the Science Meeting in Guyana

Appendix 1:
A list of publications derived from support from the BDG Program.

The pdf of this publication list is a word document in Alphabetical Order. The Excel spreadsheet is arranged by date. This file is also available in EndNotes®.

There are currently 531 publications as of this printing. This list is a work in progress and is expected to grow as our collaborators send list of publications that have used BDG collections.

Staff, affiliates, fellows, etc that have worked with the BDG Program from 1985-2010
(The Excel spreadsheet has five worksheets. Below is the title of each worksheet and what it contains.)

- 1. Degrees:** Interns, Undergraduates, Masters Degrees and PhD Degrees
- 2. Contractors etc.:** BDG Resident Collectors, Contractors, Education & Training – non-US
- 3. Specialists:** Plant and animal collaborators
- 4. Gu-Su-others:** People in Guyana, Suriname, and others that have worked with the Program.
- 5. Exp Participants:** People that participated on BDG expeditions

The sum of the above is 812.

	Funk, V. and C. Kelloff	1992 - 2006	Centre for the Study of Biological Diversity Scientific Steering Committee
<i>Media attention</i>			
	Funk, V.A.	1992-present	many newspaper articles in Guyana about the activity of the BDG Program, Smithsonian and CSBD.

Appendix 5: A detailed account of BDG base support and ancillary/leveraged funds

We have received over 3 million in Federal Funds, have raised nearly 2 million in external funds, and acquired over 2.5 million in “in kind” contributions; so around 40% of our funding has come from Federal Funds. But in reality it is hard to grasp the big picture. For instance, the “in kind” contribution does not include the salaries of either Funk or Kelloff or the other SI staff that have participated in BDG or the hundreds of boxes of donated books and journals for the library, or the hundreds of boxes of clothes, school supplies, and toys we have sent to Amerindian villages, etc.
