

## Video Transcript - Returning the Specimens

Liittschwager: So we need to put these guys back where we got them from.

Chris Meyer: In a responsible way.

Liittschwager: Yeah, I mean, it's a drag to just blunder through and cause a bunch of damage. So we'll put them back in the spot we got them.

Chris Meyer: All right, so . . .

Liittschwager: Okay. We don't want to make too much more of a mess, so we can just get them back in there. I mean, we made a little bit of heavy footprint there earlier, so try to minimize [00:00:30] the additional-

Chris Meyer: Spread out. Everybody gets to release. Yeah.

Chris Meyer: But, we release them into their habitat.

Liittschwager: And don't just toss it up in the air, you know. Get it, I mean if it's a . . .

Chris Meyer: Be gentle, release it over the . . .

Liittschwager: And you may need to tap the vial to get the guy to come out, too, or to get away from the lid.

Liittschwager: So do this: If he's stuck to the-

Speaker 3: But I'm really on the top [crosstalk 00:00:54].

Liittschwager: No, that's fine. So just hold that, okay. There we go, now turn that over, turn it over. He's going to want to go up. [00:01:00] And then blow, blow on him.

Liittschwager: Or brush him up against the leaf. Use the plant to ...

Speaker 3: Yay.

Liittschwager: So keep going. Here, give me the empties.

Speaker 4: He's right there at the bottom. See him?

Speaker 3: Oh, yeah.

Speaker 4: He's a butterfly.

Liittschwager: Yeah, we don't want to take him back to California, so make sure those vials are empty.

Chris Meyer: That's for sure.

Liittschwager: [00:01:30] There we go. Thank you all.

Speaker 3: Thank you.
