

Roles: Dr. Kingsley

Dr. Kingsley is a forensic anthropologist with a B.S. in Zoology and Physiology from the University of West Virginia and a Ph.D. in Anthropology from the University of Tennessee. He currently works for the Smithsonian Institution's National Museum of Natural History. His expertise in examining ancient human bones (some as old as 36,000 years) has been essential to law enforcement officials across the country in solving previously unsolved cases. He has worked on America's most notorious cases. His work has been the subject of several books, a Discovery Channel documentary, and an ABC 20/20 news program. Dr. Kingsley received the Department of the Army Commander's Award for Civilian Service for forensic investigations that helped identify victims of the 9/11 terrorist attack on the Pentagon.

This page is part of the [Smithsonian's The Secret in the Cellar Webcomic](#), an educational resource from the [Written in Bone](#) exhibition, February 2009 - 2014.
